As a go-to reference for Kentucky Transportation Cabinet (KYTC) policy and engineering guidance, the Highway Knowledge Portal (HKP) synthesizes information contained in the Cabinet's technical guidance manuals.

<https://kp.uky.edu>

Developed to provide better access to crash data and help transportation professionals in Kentucky have a better understanding of safety performance. CDAT integrates crash and roadway data, allowing users to query a segment or intersection to obtain a safety score. Similar segments or intersections may then be compared. CDAT provides easy and consistent access to crash data and methodologies employing techniques from the Highway Safety Manual.

COMMONWEALTH OF KENTUCKY
OFFICE OF THE GOVERNOR

Andy Beshear
GOVERNOR

The State Capitol, Suite 100
700 Capitol Avenue
Frankfort, Kentucky 40601
Phone: (502) 564-2611
Fax: (502) 564-2517

Dear Kentuckians:

Since first taking public office, I have made transparency a priority, ensuring data is shared with the proper authorities and policymakers, as well as with Kentuckians. Policymakers and the public are able to utilize public safety information to identify investments that have worked and investments that are still needed to make our communities safer. To continue our work to create a safer Kentucky for all, I share with you the 2022 Kentucky Traffic Collision Facts report produced by the Kentucky State Police, which includes statistics regarding vehicular collisions that occurred on Kentucky's roadways last year.

It saddens me to report that in 2022, 744 people were killed in 693 fatal traffic collisions on Kentucky's roadways. Of these deaths, 265 were due to drivers under the influence of drugs and 153 were due to drivers under the influence of alcohol. Each of these individuals is a unique child of God, missed by those who loved them.

One life lost in an auto collision is too many. I want to remind all motorists, both seasoned and new, to follow these safe practices and more to keep yourselves and each other safe:

- Observe posted speed limits;
- Always wear a seatbelt;
- Never text and drive; and
- Don't operate a vehicle under the influence of drugs or alcohol.

We have to work together to make our roads safer to travel for all Kentuckians and for those who visit this great commonwealth we call home. Together, let's commit to being safer drivers and to decreasing the number of auto collisions and fatalities in 2023.

Sincerely,

A handwritten signature in black ink that reads "Andy Beshear".

Andy Beshear

Andy Beshear

Kerry Harvey
Secretary

Col. Phillip Burnett, Jr.
Commissioner

The Honorable Andy Beshear
Governor of Kentucky
The Capitol
Frankfort, Kentucky 40601

Dear Governor Beshear:

Kentucky Revised Statutes, Chapter 189.635, mandates that Kentucky State Police collect and tabulate the traffic collision reports submitted by all law enforcement agencies across the Commonwealth.

In adherence to this statute, the Kentucky State Police proudly presents the 2022 Kentucky Traffic Collision Facts report. This report provides a collection of statistical data, based on comprehensive evaluation and analysis of collisions that resulted in fatalities, injuries, and property damage.

The Kentucky State Police would like to take this opportunity to thank all law enforcement agencies that contribute data. In addition, gratitude is also extended to the Kentucky Transportation Center, College of Engineering, at the University of Kentucky, for their efforts in the successful completion of this report. This mutually beneficial joint-effort has produced an accurate account of traffic collision data, while also offering a broader analytical insight into several special interest areas.

We sincerely hope the information contained herein provides beneficial information to law enforcement agencies, as well as various other national, state, and local organizations. Most importantly, we hope this data will inspire all citizens to work with officials to create a more heightened sense of highway safety across our great Commonwealth.

Respectfully submitted,

Col. Phillip Burnett, Jr.
Commissioner

All citizens of the Commonwealth of Kentucky share the sorrow brought about by senseless tragedies on our streets and highways.

**This Collision Facts Report
would like to remember the**

762

**who were victims of fatal traffic collisions
on Kentucky's public roads in 2022.**

INTRODUCTION

Kentucky's *Traffic Collision Facts* is based on collision reports submitted to the Kentucky State Police Records Branch. As required by Kentucky Revised Statute 189.635:

"Every law enforcement agency whose officers investigate a vehicle accident of which a report must be made...shall file a report of the accident...within ten days after investigation of the accident upon forms supplied by the bureau."

The stated purpose of this requirement is to utilize data on traffic collisions to improve the Commonwealth's traffic safety program.

Unless otherwise noted, data in this publication are for public roads only. Data contained in this report are based solely on the observations and judgements of the state and local police officers who investigated each collision. Collision data are contained in an automatic system called the Collision Report Analysis for Safer Highways (CRASH). This system carries out edit checks for accuracy, which may include manual adjustments based on the Fatal Accident Reporting System (FARS).

Computer tabulations and summaries are again checked for accuracy before information is released or disseminated. It is hoped that the detailed information presented in this report will, in fact, "improve the traffic safety program within the Commonwealth."

The National Highway Traffic Safety Administration (NHTSA) *Manual on Classification of Motor Vehicle Traffic Crashes*¹ is used to ensure uniformity and compliance with federal requirements.

Standard definitions and terms used in this booklet include the following:

Motor Vehicle Traffic Collision: any motor vehicle collision that occurs on a trafficway or that occurs after the motor vehicle runs off roadway but before events are stabilized.

Collision: an unintended event that produces death, injury, or damage. The word "injury" includes "fatal injury."

Trafficway: the entire width between property lines or other boundary lines, of every way or place, of which any part is open to the public for purposes of vehicular travel as matter of right or custom.

Fatal Collision: any motor vehicle collision that results in fatal injuries to one or more persons.

Fatality: a person or persons killed in a fatal collision (also referred to as "persons killed").

Nonfatal Injury Collision: any motor vehicle collision that results in injury, other than fatal, to one or more persons (also referred to as "personal injury collision").

Injured: a person or persons injured in a collision (also referred to as "persons injured").

Property Damage Only (PDO) Collision: any motor vehicle collision in which there is no injury to any person, but only damage to a motor vehicle or other property, including injury to domestic animals.

Alcohol-Related Collision: any collision in which an operator was observed to have been drinking by the officer investigating the collision.

NOTE: Data processing methods were updated beginning with the 2019 (FY2020) publication. This may result in slight changes, but should improve the overall quality and accuracy of this report. Depending on when the data extract was received, there may be slight variances as crash information may change following crash investigations. Fatalities may be manually adjusted to match FARS following the extract but other numbers may not be adjusted. This summary comes from a snapshot of data captured in the second quarter of the year of publication following the end of the previous calendar year, which is done to ensure the data have been finalized.

COLLISION SUMMARY

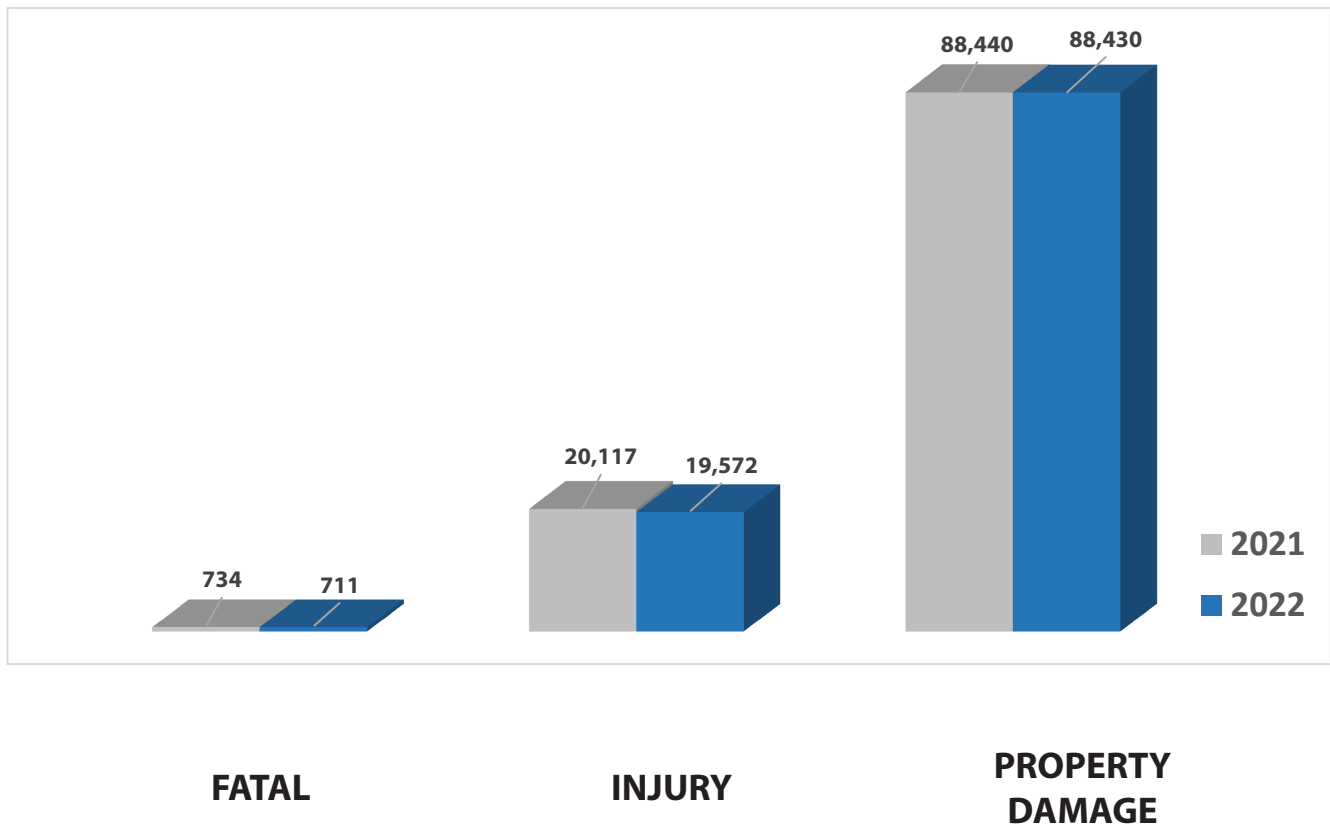

YEAR-OVER-YEAR COLLISION SUMMARY

TYPE OF COLLISION REPORTED	2021	2022	CHANGE
FATAL (PUBLIC ROADS)	734	711	-3.1%
NONFATAL (PUBLIC ROADS)	20,117	19,572	-2.7%
PROPERTY DAMAGE ONLY (PUBLIC ROADS)	88,440	88,430	0.0%
TOTAL REPORTED (PUBLIC ROADS)	109,291	108,713	-0.5%

FATAL (PARKING LOTS / PRIVATE PROPERTY)	10	12	20.0%
NONFATAL (PARKING LOTS / PRIVATE PROPERTY)	594	597	0.5%
PROPERTY DAMAGE (PARKING LOTS / PRIVATE PROPERTY)	21,313	20,720	-2.8%
TOTAL REPORTED (PARKING LOTS / PRIVATE PROPERTY)	21,917	21,329	-2.7%

TOTAL ALL REPORTED COLLISIONS	131,208	130,042	-0.9%
FATAL COLLISIONS (TOTAL)	746	723	-3.1%

**Total Reported Collisions on Public Roads
Decreased 0.9% in 2022 Compared to 2021.**

DEATH AND INJURY SUMMARY

	2021	2022	CHANGE
PERSONS KILLED+ (Public Roads)	806	762	-5.5%
PERSONS KILLED (Parking Lots/Private Property)	10	12	20.0%
PERSONS KILLED++ (Total)	816	774	-5.1%
PERSONS INJURED (Public Roads)	29,372	28,773	-2.0%
PERSONS INJURED (Parking Lots/Private Property)	672	678	0.9%
PERSONS INJURED (Total)	30,044	29,451	-2.0%

+ This figure was manually adjusted after review. Persons killed are adjusted by FARS following investigation. Crashes may involve death not resulting from the crash such as a natural cause. Locations may also initially indicate a public road and later be found to be on private property.

++ This figure comes from a query of a crash data snapshot and may not align by adding public roads and parking lots/private property.

In 2022

1 IN 5,830 KENTUCKY RESIDENTS DIED AS A RESULT OF A FATAL TRAFFIC COLLISION ON A PUBLIC ROAD IN KENTUCKY

1 IN 153 KENTUCKY RESIDENTS WAS INJURED IN A TRAFFIC COLLISION IN KENTUCKY*

1 IN 22 DRIVERS LICENSED IN KENTUCKY WAS INVOLVED IN A TRAFFIC COLLISION IN KENTUCKY

1 IN 3,627 KENTUCKY DRIVERS WAS INVOLVED IN A FATAL COLLISION**

* On a population estimate of 4,512,310 for Kentucky from www.census.gov/quickfacts/KY

** Based on 3,398,060 licensed drivers in Kentucky including learner permits but excluding ID cards

- A total of **762** persons were killed on public roads in 2022.
- The total number of traffic fatalities **decreased 5.5%** from 2021.
- **28,773** persons were injured on public roads in 2022, a **decrease of 2.0%** from 2021.
- Daily Total Miles Driven in Kentucky: **131,792,000**.
- Yearly Total Miles Driven in Kentucky: **48,104,080,000**.

INJURY TYPE	NUMBER	%
KILLED		
Public Roads	762	2.6%
Parking Lots/Private Property	12	1.7%

++ NHTSA Traffic Safety Facts & NSC Motor Vehicle Fatality Estimates

FATALITIES BY AGE AND SEX

In 2022 **544** men and **214** women were killed.

13.1% of all persons killed in traffic collisions were in the **15 to 24 year old age group**.

The percentage of men or women killed in a given age group as a percentage of the total men or women killed is presented in the table to the right.

Age	Male	Female
0-14	2%	4%
15-24	12%	16%
25-34	14%	17%
35-44	17%	15%
45-54	14%	11%
55-64	17%	15%
65-74	14%	8%
75 and older	10%	12%

Slight discrepancies may exist in totals due to unknown gender or unknown age at the time a crash is coded.

The number of persons killed in fatal collisions in 2022 is shown by age and sex in the chart below.

SEVERITY OF INJURY BY COLLISION TYPE

The table below summarizes injury data by collision type.

COLLISION TYPE	TYPE OF INJURY						
	TOTAL COLLISIONS	(K) KILLED	(A) SUSPECTED SERIOUS INJURY	(B) SUSPECTED MINOR INJURY	(C) POSSIBLE INJURY	% OF TOTAL OCCUPANTS KILLED OR INJURED	FATAL COLLISIONS
COLLISION WITH MOVING VEHICLE	69,123	279	1,320	7,816	10,415	67.1	254
COLLISION WITH FIXED OBJECT	17,202	177	637	1,763	2,031	15.6	166
OTHER NON-COLLISION	6,319	146	436	1,122	866	8.7	135
COLLISION WITH PEDESTRIAN	983	102	172	360	230	2.9	100
NON-COLLISION OVERTURNED	729	28	64	172	191	1.5	26
COLLISION WITH OTHER OBJECT	1,493	4	31	123	108	0.9	4

TOTALS	108,713	762	2,785	11,805	14,183	100	711

OCCURRENCE OF COLLISIONS BY TYPE

Severity by type visualized.

ALL COLLISIONS

Looking at **all** collisions:

~**64%** involved collisions between two or more moving vehicles.

~**16%** involved collisions with fixed objects.

~**1%** involved pedestrians or pedalcyclists

- Moving Vehicle
- Fixed Object
- Pedestrian or Pedalcyclist
- All Other
- Non-Collisions

Looking at **fatal** collisions:

~**36%** involved a collision with another moving vehicle.

~**23%** involved collisions with fixed objects.

~**14%** involved pedestrians or pedalcyclists

Fatal Collisions

- Moving Vehicle
- Fixed Object
- Pedestrian or Pedalcyclist
- All Other
- Non-Collisions

Specific types of collisions and the percentage of total collisions and fatalities for each collision category are shown on the next page.

COLLISION TYPES

Collisions with other moving motor vehicles were responsible for **~69%** of all collisions reported, and accounted for **~37%** of all fatalities (persons killed).

Collisions with fixed objects accounted for **~17%** of all collisions but **~31%** of fatalities.

COLLISIONS WITH MOVING MOTOR VEHICLE:

Persons Killed:	149
% of Total Fatalities:	19.55
# of Fatal Collisions:	138
% if All Fatal Collisions:	19.41

PEDESTRIAN COLLISIONS

96 pedestrians were killed and 695 injured in traffic collisions in 2022. The charts below indicate the ages of victims of pedestrian collisions and factors related to the pedestrian and vehicle at the time of the collision.

3.1% of the pedestrians killed or injured were 14 years of age or younger, while 21.9% were 65 or older.

PEDESTRIAN FACTOR	TOTAL ACTIONS FOR KILLED OR INJURED PEDESTRIANS BY AGE CATEGORY										
	Fatal Action	Injury Actions	0-4	5-9	10-14	15-19	20-24	25-44	45-64	65-Up	Not Stated

Skating/Skateboarding	10	0	2	1	0	0	0	1	14
Walking in Roadway	201	6	16	6	3	8	9	16	265
Working in Roadway	23	0	1	0	1	3	2	5	35
Working on Vehicle	14	0	0	1	1	6	0	3	25
TOTAL*	879	123	213	34	27	54	25	78	1,433

*These totals may be higher than the actual number of pedestrians involved because they reflect multiple pedestrian actions, as up to three pedestrian factors can be coded for one collision.

Slight discrepancies may exist in numbers if pedestrian flees a scene, or is otherwise coded as unidentified.

HIT-AND-RUN COLLISIONS

Hit-and-run collisions occur when the driver leaves the collision scene with the intent of evading responsibility. Hit-and-run is a serious violation of the law. In 2022 there were **11,012** hit-and-run collisions, of which **28** were fatal collisions and **955** were injury collisions.

Most of Kentucky's hit-and-run collisions were property damage collisions (**91.1%**). **28** persons were killed and **1,206** were injured.

TOTAL	FATAL COLLISIONS	INJURY COLLISIONS	PROPERTY DAMAGE COLLISIONS	PERSONS KILLED	PERSONS INJURED
11,012	28	955	10,029	28	1,206

HIT-AND-RUN VICTIMS

14 persons killed in hit-and-run collisions were pedestrians and **3** were pedalcyclists. **106** pedestrians and **38** pedalcyclists were injured.

VICTIM TYPE	PERSONS KILLED	PERSONS INJURED
Pedestrian	14	106
Pedalcyclist	3	38
Other	11	1,062
TOTAL	28	1,206

LOCATION OF HIT-AND-RUN COLLISIONS

Locations of hit-and-run collisions are shown in the chart below.

The largest percentage of hit-and-run collisions (**41%**) occurred on city streets, followed by state routes (**25%**) and U.S. Routes (**16%**).

ROADWAY TYPE	ALL HIT-AND-RUN COLLISIONS	FATAL COLLISIONS	INJURY COLLISIONS	PROPERTY DAMAGE
INTERSTATE	1,227	3	112	1,112
U.S. ROUTE	1,710	3	160	1,547
STATE ROUTE	2,761	12	301	2,448
PARKWAY	63	-	6	57

LAND USE

COLLISION LOCATIONS

For the purpose of tabulating collision locations, an urban area is an area including and adjacent to a municipality or other place with a population greater than or equal to 5,000. Rural areas are places that do not meet this criterion. As shown in the chart below, most collisions (61%) occurred in urban areas.

61% of injury collisions occurred in urban areas, however, a slightly higher number of fatal collisions (49.9%) took place in rural areas. A much higher percentage of property damage collisions was reported in urban areas.

RURAL VS. URBAN

AREA	Number of Collisions	% of Total	Fatal	% of Total	Nonfatal Injury	% of Total	Property Damage	% of Total	Killed	% of Total	Injured	% of Total
Rural	41,914	38.6	355	49.9	7,428	38.0	34,131	38.6	385	50.5	10,971	38.1
Urban	66,056	60.8	348	49.0	11,989	61.3	53,719	60.8	368	48.3	17,573	61.1
Unknown	743	0.7	8	1.1	154	0.8	581	0.7	9	1.2	227	0.8
TOTAL	108,713	100	711	100	19,571	100	88,431	100	762	100	28,771	100

COLLISION LOCATION BY ROADWAY TYPE

The chart at right shows the number of collisions by roadway type, with percentages of all collisions.

35% of all collisions occurred on Kentucky's state numbered routes, with **47%** of all fatal collisions occurring on this type of roadway.

Although **21%** of all collisions occurred on city streets, only **7%** of the fatal collisions occurred on city streets.

TYPE	Fatal Collisions	Nonfatal Injury	Property Damage	Percent Total

* In 2019 the William H. Natcher Parkway was redesignated as Interstate I-165 following completion of a project that brought the highway up to Interstate Highway Standards. Tables reflect data as they were recorded by first responders.

COLLISIONS BY ROADWAY CONDITIONS AND ROADWAY CHARACTER

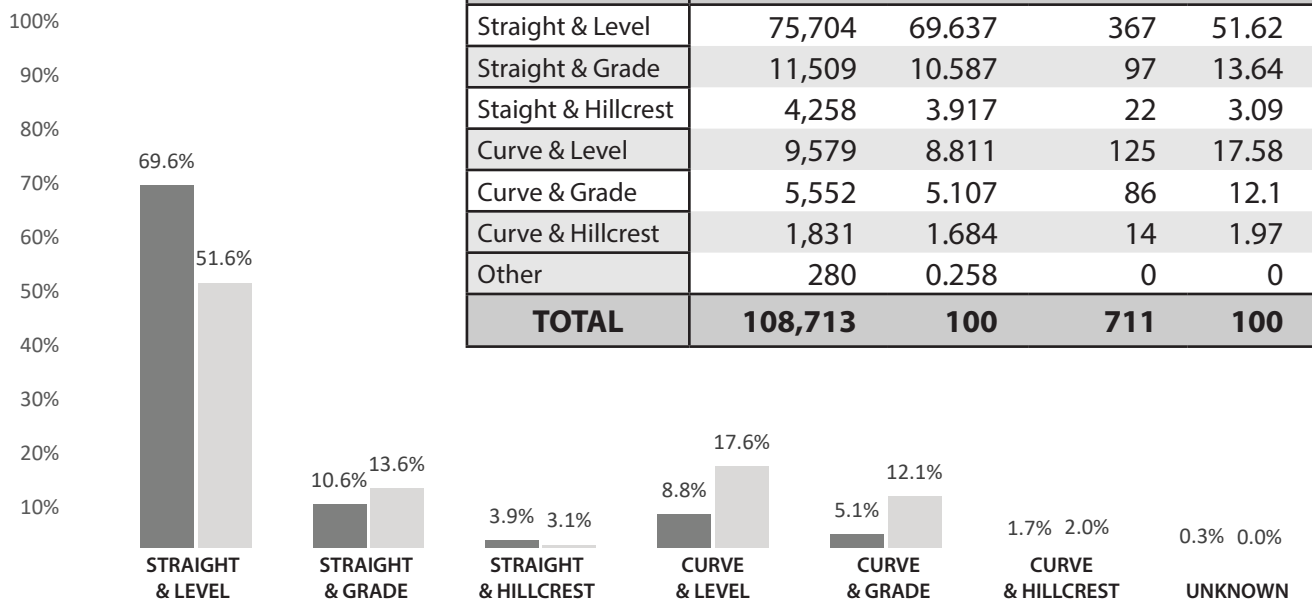

The charts below provide a breakdown of collisions and fatal collisions by roadway surface condition and roadway character.

The Collisions by Roadway Surface chart compares fatal collisions with all collisions for different road conditions identified by the police officer who completed the collision investigation report.

84% of all collisions occurred on straight roads and **16%** on curved roads. **32%** of fatal collisions occurred on curved roads.

ALL COLLISIONS
FATAL COLLISIONS

COLLISIONS BY LIGHT CONDITION

FATAL COLLISIONS
(excludes unknown light conditions)

TWO-VEHICLE COLLISIONS

The above chart summarizes data on the vehicular action for two-vehicle collisions, where known.

- **64,635** traffic collisions (including **234** fatal collisions) reported in 2022 were two-vehicle collisions. These collisions represented **59%** of all collisions and **33%** of fatal collisions reported.
- Head-on collisions accounted for **~3%** of all collisions involving two vehicles but **~34%** of fatal collisions.
- Rear-end collisions accounted for **~17%** of all two-vehicle collisions but only **~6%** of fatal collisions.
- Sideswipe collisions (both meeting and passing) made up **~21%** of all collisions and **~6%** of fatal collisions.
- Angle collisions accounted for **~33%** of all two-vehicle collisions, but represented the highest percentage of fatal collisions at nearly **47%**.

COLLISIONS BY DAY OF WEEK AND MONTH

23% of all collisions and 28% of fatal collisions occurred on weekends (Saturday and Sunday combined).

By month, **December** had the most collisions. **September** had the most fatal collisions.

The graphs below show all collisions and fatal collisions by day of occurrence (excluding unknown).

COLLISIONS BY DAY OF WEEK

COLLISIONS BY MONTH

HOLIDAY COLLISIONS

TOTAL DEATHS HOLIDAY DEATH TOLL

The chart below lists the number of deaths in fatal collisions and the number of alcohol-involved deaths (as indicated by blood-alcohol tests) over holiday periods during the last five years.

HOLIDAY PERIOD	2018		2019		2020		2021		2022

Not Stated	0	0.00	0	0.00
TOTAL	196,260	100	1,246	100

- There were **196,260** vehicles involved in collisions in 2022.
- Of these, **158,726** were involved in property damage only collisions, **36,288** were involved in injury collisions, and **1,246** were involved in fatal collisions.
- Most (**89%**) vehicles involved in all collisions were passenger cars (**70%** in fatal collisions).
- Trucks accounted for **5%** of vehicles in all collisions, but **8%** of vehicles in fatal collisions.
- Motorcycles represented **8%** of vehicles in fatal collisions, but **less than 1%** of vehicles in all collisions.

VEHICLES REGISTERED IN KENTUCKY	
Cars/Trucks	3,625,953
Buses	16,556
RV or Motorhome	11,625
Motorcycle	99,613
Other	57,380
Total	3,811,127

Commercial Vehicles	186,501
---------------------	---------

* Passenger cars include automobiles and trucks whose registered weights are 6,000 pounds or less.

TRUCK COLLISIONS

Contributing vehicular factors, as noted by the investigating officer on the collision report, are shown below for collisions involving trucks. A truck is defined as a vehicle with a registered weight of 10,000 pounds or more. Up to two factors may be noted for each vehicle in a collision. Number represents the number of trucks for a given factor, and the percent is the percentage of all trucks for that factor.

666 truck-related factors were reported in collisions, 5 in fatal collisions, and 76 in non-fatal injury collisions.

CONTRIBUTING VEHICULAR FACTORS	NUMBER OF TRUCKS INVOLVED IN:					
	ALL COLLISIONS		FATAL COLLISIONS		NONFATAL INJURY COLLISIONS	
	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT
Defective Brakes	57	0.55	0	0	10	0.67

Total	86	1,351	8,000	9,437	3	35	154	192

The residence of truck drivers involved in collisions is shown below. 42% of drivers with known residences were non-residents of Kentucky. This is 40% for fatal collisions and 42% for injury collisions. Local residents live in the county where the collision occurred.

RESIDENCE OF DRIVERS IN TRUCK COLLISIONS	ALL COLLISIONS	FATAL COLLISIONS	INJURY COLLISIONS
Local Resident	2,140	24	355
State Resident	3,072	36	443
Out-of -State Resident	4,368	41	615
Not Stated	804	1	68
TOTAL	10,384	102	1,481

DRIVER INVOLVEMENT (BY RESIDENCE AND SEX)

RESIDENCE OF DRIVER

There were **178,927** drivers involved in collisions. Of these, **1,099** were involved in fatal collisions. The chart below tabulates driver involvement by residence and shows that most drivers (~62% of those for whom the residence is known) were local residents (reside in the county where the collision occurred).

Many drivers in the **Unknown/Not Stated** category represent hit-and-run collisions where driver identities remain unknown. There may be fewer drivers than vehicles because of collisions with unoccupied vehicles (generally a parked vehicle).

INVOLVEMENT BY RESIDENCE

DRIVER RESIDENCE	NUMBER INVOLVED IN ALL COLLISIONS	PERCENT OF TOTAL
LOCAL RESIDENT	111,294	62.2
STATE RESIDENT	43,296	24.2
OUT OF STATE	23,492	13.13

NOT STATED	2	0.18
TOTAL	1,099	100

DRIVER AGES (ALL COLLISIONS)

The chart below groups all traffic collisions by driver age bracket (for which age information was available).

For each age category, the following information is shown: the percentage of drivers involved in all collisions, the number of drivers involved in these collisions (shown in parentheses), the percentage of all licensed drivers, and the number of licensed drivers (shown in parentheses, including learner permits). This facilitates comparisons between the percentage of a given category of the driving population and the corresponding percentage of age category involved in collisions.

These data do not differentiate at-fault drivers from not-at-fault drivers.

NOTE: PERCENTAGE OF LICENSED DRIVERS IN EACH AGE CATEGORY IS BASED ON 3,398,060 DRIVERS LICENSED IN KENTUCKY. (Includes learner permits.)

DRIVER AGE (FATAL COLLISIONS)

The chart below groups all fatal traffic collisions by driver age bracket (for which age information was available). Note that the drivers were not necessarily killed in the fatal collision.

The number of drivers involved in fatal collisions may exceed the total number of fatal collisions.

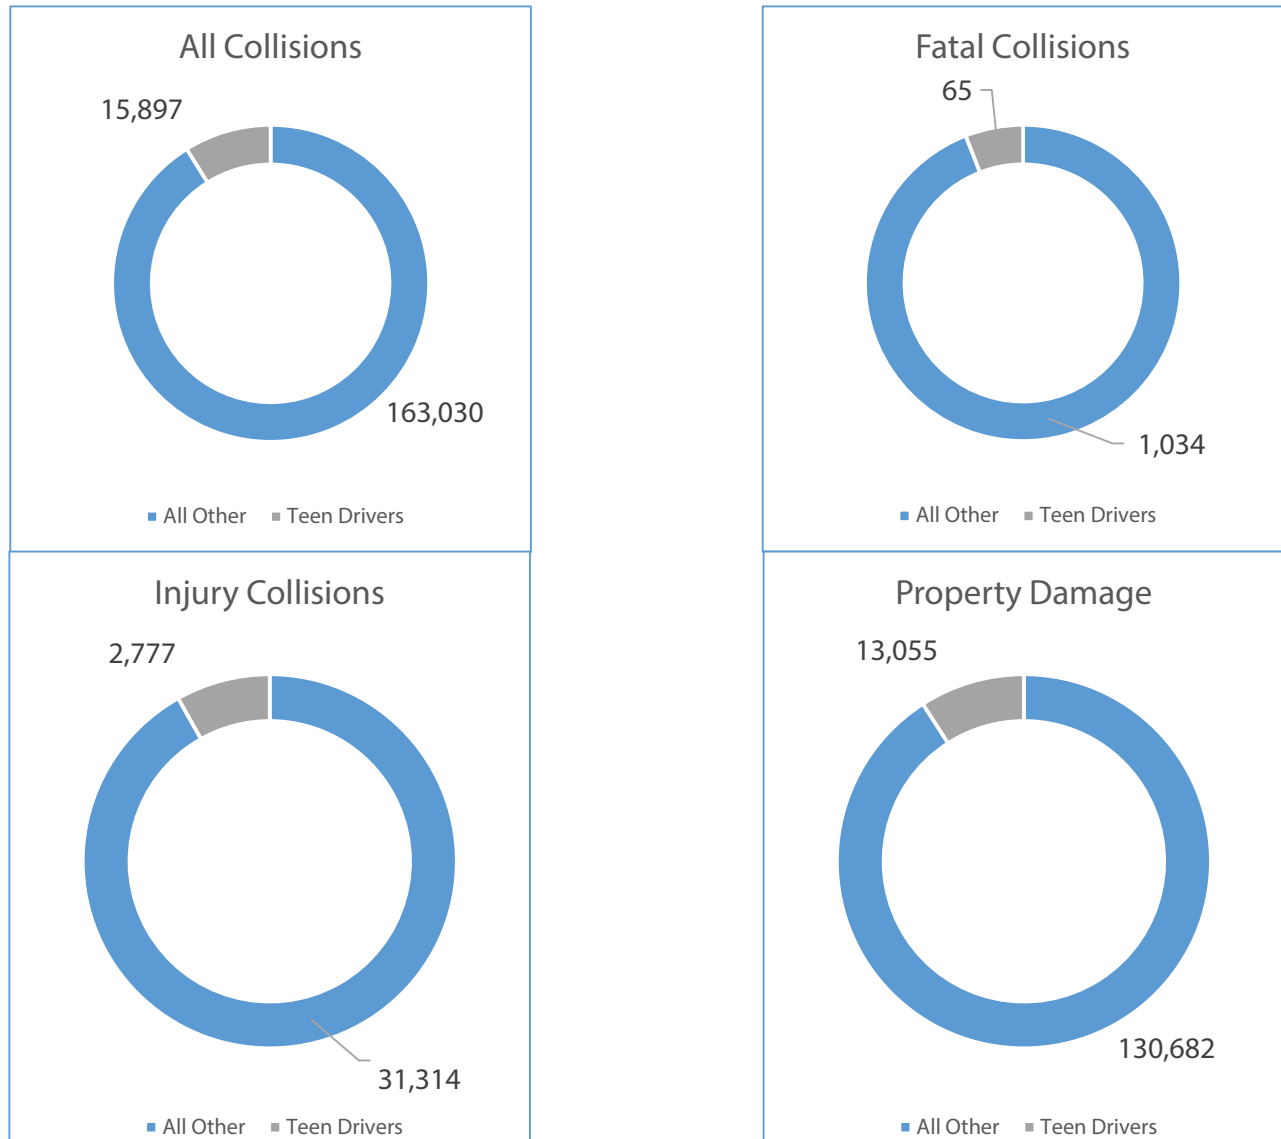

For individual age categories, the percentage of the driving population can be compared to the corresponding percentage involved in fatal collisions.

NOTE: PERCENTAGE OF LICENSED DRIVERS IN EACH AGE CATEGORY IS BASED ON NUMBER OF DRIVERS LICENSED IN KENTUCKY. (Includes learner permits.)

COLLISIONS INVOLVING TEENAGE DRIVERS

The charts below compares the percentages of teenage drivers (16 to 19 years of age) involved in collisions to all other age groups. Licensed teenage drivers represent **7%** of Kentucky drivers (including learner's permits).

The number of teenage drivers involved in collisions, together with alcohol-related collisions, is shown below. Tabulations for alcohol-related collisions were derived from the total number of drinking drivers as reported by the officer at the scene. FARS would likely report higher numbers.

There were 65 fatalities in collisions involving a teenage driver (29 fatalities being the teenage driver).
There were 21 fatalities in alcohol-related collisions involving teenage drivers (8 fatalities being the teenage driver).

NUMBER OF TEENAGE DRIVERS INVOLVED IN:								
YEAR	ALL COLLISIONS	FATAL COLLISIONS	INJURY COLLISIONS	PROPERTY DAMAGE	ALCOHOL RELATED COLLISIONS			
					FATAL	INJURY	PROPERTY DAMAGE	TOTAL
2022	15,882	65	2,775	13,042	10	85	178	273
2021	16,396	64	3,019	13,313	7	85	151	243
2020	14,594	64	2,869	11,661	5	87	149	241
2019	19,729	42	3,395	16,292	4	80	149	233
2018	20,191	59	3,521	16,611	3	95	152	250

ALCOHOL-RELATED COLLISIONS

An alcohol-related collision is any collision where a driver was determined to have been drinking. For injury and property damage collisions, the following information gives the determination made at the scene by the investigating officer and recorded on the collision report. However, more detailed information on drinking drivers in fatal collisions is obtained from FARS, which follows up on blood alcohol content (BAC) results.

Alcohol-related collisions are listed by county beginning on page 40. The following information was adjusted to ensure consistency with FARS statistics involving fatal collisions; therefore, these numbers may not agree with previously listed state totals.

ALL COLLISIONS	FATAL COLLISIONS (as reported)	96	PERSONS KILLED/INJURED	(K) NUMBER KILLED (as reported)	109
	FATAL COLLISIONS (adjusted by FARS)	138		(K) NUMBER KILLED (adjusted by FARS)	153
	INJURY COLLISIONS	978		(A) SUSPECTED SERIOUS INJURY	303
	PROPERTY DAMAGE COLLISIONS	2,186		(B) SUSPECTED MINOR INJURY	634
	TOTAL (adjusted by FARS)	3,302		(C) POSSIBLE INJURIES	495
			TOTAL INJURIES (with data adjusted by FARS)	1,432	

The total number of alcohol-related collisions is shown in the left-hand chart. The number of persons killed and injured in alcohol-related collisions is listed in the right-hand chart.

4% of the alcohol-related collisions were fatal, 30% were injury collisions, and 66% were property damage only.

Comparison with previous years

Alcohol-related collisions slightly **decreased** in 2022 over 2021.

There were **153** persons killed, **8% less** than 2021.

There were **1,585** persons injured in alcohol-related collisions, **an increase of ~2%** over 2021.

Fatal collision data in the chart below were adjusted to reflect follow-up studies of alcohol test results. As a result, this table may differ from data collected at the time of the crash displayed above.

YEAR	TOTAL COLLISIONS (Alcohol Related)	% CHANGE FROM PREVIOUS YEAR	TOTAL KILLED	% +/-	TOTAL INJURED	% +/-
2022	3,302	1.0%	153	-8%	1,585	2%
2021	3,410	0.7%	165	-10%	1,555	17%
2020	4,978	1.1%	181	25%	1,284	4%
2019	4,703	1.0%	135	8%	1,230	-3%
2018	4,736	0.9%	124	-27%	1,261	0%

SAFETY RESTRAINTS

The chart below compares safety belt usage rates for the past five years.

Data were obtained as part of an annual observational survey conducted at sites across Kentucky.

YEAR	ALL VEHICLES USING SAFETY BELT	PICKUPS USING SAFETY BELT
2022	86.7%	78.3%
2021	89.8%	81.6%
2020 *	No Data Collected	No Data Collected
2019	89.7%	83.7%
2018	89.9%	80.5%

The chart below shows vehicle occupants by injury status and separates occupants into the categories of Restraint Used and Restraint Not Used.

Overall, **9.4%** of all vehicle occupants involved in a crash were killed or injured. A breakdown by restraint usage shows only **10.3%** of those restrained were killed or injured, compared to **50.8%** of those who were not restrained.

Comparing the percentages killed or injured in the Restraint Used and Restraint Not Used categories shows the benefit of wearing a safety belt. The "Not Applicable" category includes occupants in vehicles that normally do not have safety restraints, occupants where safety restraints usage was not indicated, occupants not in an appropriate position, or pedestrians and pedalcyclists.

INJURY STATUS	ALL OCCUPANTS		RESTRAINT USED		RESTRAINT NOT USED		NOT APPLICABLE	
	NUMBER	% OF TOTAL	NUMBER	% OF TOTAL	NUMBER	% OF TOTAL	NUMBER	% OF TOTAL
(K) KILLED	762	0.24	250	0.11	276	5.97	236	0.31

CONTRIBUTING FACTORS

CONTRIBUTING FACTORS — ALL COLLISIONS

Many factors and conditions contribute to collisions. **Police officers may indicate up to three driver factors for each driver, two vehicular factors for each vehicle, and up to two environmental factors for each collision.**

This table below reports the number of collisions for which a given factor was listed at least once.

HUMAN FACTORS	ALL COLLISIONS	PERCENT OF TOTAL	FATAL COLLISIONS	PERCENT OF TOTAL
ALCOHOL INVOLVEMENT +	3,260	3	96	13.5
CELL PHONE	955	0.88	2	0.28

+ Data were reported by KSP and may differ from FARS-adjusted data listed on page 22.

++ These numbers may be vastly under-reported. It's difficult to measure how many crashes are caused by drugged driving. This is because a good roadside test for drug levels in the body doesn't yet exist, some drugs can stay in your system for days or weeks after use making it difficult to determine when the drug was used and therefore, how and if it impaired driving, police don't usually test for drugs if drivers have reached an illegal blood alcohol level because there's already enough evidence for a DUI charge, and many drivers who cause crashes are found to have both drugs and alcohol or more than one drug in their system, making it hard to know which substance had the greater effect.

CONTRIBUTING FACTORS — ALL COLLISIONS

(continued)

Many factors and conditions contribute to collisions. **Police officers may indicate up to three driver factors for each driver, two vehicular factors for each vehicle, and up to two environmental factors for each collision.**

The table below reports the number of collisions for which a given vehicular or environmental factor was listed at least once.

VEHICULAR FACTORS	ALL COLLISIONS	PERCENT OF TOTAL	FATAL COLLISIONS	PERCENT OF TOTAL
BRAKES DEFECTIVE	1,322	1.22	0	0
HEADLIGHT FAILURE	90	0.08	2	0.28
LOAD SECUREMENT	280	0.26	0	0

**FATALITY
ANALYSIS
REPORTING
SYSTEM
(FARS)**

FATALITY ANALYSIS REPORTING SYSTEM (FARS)

FARS is a computerized file containing data on all fatal motor vehicle traffic collisions occurring each year in the 50 states, the District of Columbia, and Puerto Rico. The system is operated by the NHTSA for the purpose of identifying safety problems, suggesting solutions, and providing an objective basis to evaluate the effectiveness of motor vehicle safety standards and highway safety countermeasures.

NHTSA has a contract with a government agency in each state for the purpose of acquiring fatal collision data. In Kentucky, this contract is with the Kentucky State Police Records Section.

For reasons of timeliness in reporting and continuity among states, FARS counts only fatalities that occur within 30 days of the collision date. FARS does not include fatalities occurring in parking lots or on private property. FARS differs from Kentucky data in that it stores data not only from the collision reports submitted from across the state, but also interfaces with many other sources to obtain additional data pertinent to the collision, vehicles, and drivers. Examples of additional data sources include vehicle registration files, driver licensing data, vital statistics, EMS reports, labs, coroners, and medical examiners. **FARS DATA CANNOT BE COMPARED DIRECTLY WITH THE PREVIOUSLY LISTED STATISTICS DUE TO THE DIFFERENCE IN REPORTING CRITERIA.**

DRIVERS INVOLVED IN FATAL COLLISIONS — AGE AND ALCOHOL INVOLVEMENT

The chart below provides the ages of all drivers in fatal collisions and alcohol-involved drivers in fatal collisions during the same time period and the percentages of involvement for different ages and age groups. Alcohol-involved teenage drivers (ages 13 through 19) represent 2% of the total number of drinking drivers involved in fatal collisions.

NOTE: Data are derived from FARS. The number of alcohol-involved drivers in FARS differs from those reported through the Kentucky Collision Reporting System because FARS follows up on alcohol test results.

*Alcohol-involved drivers refers to a driver suspected by the police of drinking and who tested positive for alcohol in a subsequent test (.01 BAC or higher).

AGE	Number of Drivers Involved	Alcohol-Involved Drivers*	% Alcohol Involved
Under 16	6	1	17
16	9	0	0

Over 74	81	4	5
Unknown	18	0	0
Totals	1,066	143	13

ALCOHOL INVOLVEMENT BY AGE AND TEST RESULTS FOR DRIVERS INVOLVED IN FATAL COLLISIONS

IN 2022 **143** PERSONS WERE KILLED IN ALCOHOL-INVOLVED CRASHES.
THIS REPRESENTS **~18%** OF ALL PERSONS KILLED IN TRAFFIC COLLISIONS IN KENTUCKY.

The chart below shows drinking drivers by age and alcohol test result. **78%** of the drinking drivers tested had a BAC of 0.10% or above at the time of the collision.

AGE	NUMBER OF DRINKING DRIVERS*	BAC TEST RESULTS			
		.01 - .05	.06 - .09	.10 - .19	.20+
Under 16	1	1	0	0	0
16	0	0	0	0	0

65-74	6	1	1	2	2
75+	4	1	1	1	1
Unknown	0	0	0	0	0
TOTAL	143	9	23	67	44

25% OF FATALLY INJURED PEDESTRIANS OVER THE AGE OF 15 WERE DRINKING.

THEIR AVERAGE BAC WAS **.17**.

Another traffic hazard is the drinking pedestrian. The chart on the right shows the number of fatally injured pedestrians by age and BAC test results.

The total number of pedestrians in FARS differs from the number reported through the Kentucky Collision Reporting System because FARS does not include pedestrians killed in parking lots.

FATALLY INJURED PEDESTRIANS

AGE	TOTAL	NUMBER DRINKING	AVERAGE TEST RESULTS
0-5	3	0	0
6-10	0	0	0

81+	3	0	0
UNKNOWN	0	0	0
TOTAL	94	24	0.17

SAFETY RESTRAINTS AND EJECTIONS IN FATAL COLLISIONS

The chart below summarizes outcomes for fatal collisions when motorcycle helmets and other restraints (e.g. safety belts, harnesses, and child restraints) were used. Comparing the Used and Not Used categories for 2022, FARS data confirm the lifesaving advantage as well as the reduction in serious injuries when restraints are in place.

54% OF VEHICLE OCCUPANTS KILLED WERE NOT RESTRAINED.

28% OF VEHICLE OCCUPANTS SUFFERING A SUSPECTED/POSSIBLE INJURY WERE NOT RESTRAINED.

NON-MOTORISTS ARE NOT INCLUDED IN THE CHARTS BELOW.

RESULT	MOTORCYCLE HELMET			RESTRAINT			TOTAL
	Used	Not Used	Unknown	Used	Not Used	Unknown	
(K) Killed	33	82	0	239	279	0	633
(A) Suspected Serious Injury	1	2	0	90	54	2	149
(B) Suspected Minor Injury	2	3	0	112	46	0	163
(C) Possible Injury	0	2	0	98	23	0	123
(O) No Injury	0	0	0	364	40	4	408
Unknown if Injured	0	0	0	1	0	16	17
Injured, Severity Unknown	0	0	0	0	0	0	0
TOTAL	36	89	0	904	442	22	1,493

Of the **1,346** vehicle occupants involved in fatal collisions, only **904** were using safety restraints — an overall usage rate of **67%** in fatal collisions. (*Motorcycle occupants are not included*).

EJECTION

RESULTS	Total Ejection	Partial Ejection	No Ejection	Unknown	TOTAL
(K) Killed	75	25	418	0	518
(A) Suspected Serious Injury	11	0	135	0	146
(B) Suspected Minor Injury	3	0	155	0	158
(C) Possible Injury	2	0	119	0	121
(O) No Injury	0	0	408	0	408
Unknown If Injured	0	0	17	0	17
Injured, Severity Unknown	0	0	0	0	0
TOTAL	91	25	1,252	0	1,368

The above chart summarizes outcomes for fatal collisions according to whether the vehicle occupant was ejected from the vehicle, partially ejected, or not ejected.

86% OF VEHICLE OCCUPANTS WHO WERE EITHER TOTALLY OR PARTIALLY EJECTED WERE KILLED. These data also reaffirm the lifesaving advantage of using an active restraint, since the possibility of being ejected upon impact is significantly reduced.

Motorcycles are excluded for ejections (not applicable under FARS guidelines).

CHILD RESTRAINTS IN FATAL COLLISIONS

Kentucky's "child restraint law" (KRS 189.125) requires that "Any driver of a motor vehicle, when transporting a child of forty (40) inches in height or less in a motor vehicle operated on the roadways, streets, and highways of this state, shall have the child properly secured in a child restraint system of a type meeting federal motor vehicle safety standards."

To qualify, the child restraint system must be certified as having been federally approved. (Federal approval of a child restraint system is based on its having withstood dynamic crash tests a 30 mph collision into a fixed barrier.)

Data on child restraints summarized in the chart below indicate age (4 years and under) rather than the height of the child. Other states with child restraint laws have adopted the "four years and under" standard in their statutes.

RESULT	AGE 4 & UNDER TOTAL	CHILD RESTRAINT USED	LAP BELT &/OR HARNESS USED	NONE USED	UNKNOWN
Killed	7	5	0	2	0
Injured (Incapacitating)	1	0	1	0	0
Injured (Non-Incapacitating)	4	3	1	0	0
Injured (Possible)	5	5	0	0	0
Not Injured	7	7	0	0	0
TOTAL	24	20	2	2	0

COST OF KENTUCKY TRAFFIC COLLISIONS

\$3.2 BILLION to \$18.1 BILLION (Estimated Economic Cost vs Estimated Comprehensive Cost)

The calculable costs (Economic Costs) of motor vehicle collisions on public roads include wage losses, medical expenses, administration costs, property damage, and employer costs. Comprehensive Costs include the Economic Cost components plus a measure of the value of lost quality of life associated with deaths and injuries.

Estimated Costs provided by the National Safety Council (Injury Facts[®]) that account for Economic and Comprehensive Costs were used to estimate a cost range for traffic collisions in Kentucky that occurred on public roads.

Costs for 2020 were used as this is the most recent available at the time of this publication.

HEATSTROKE PREVENTION TIPS FOR PARENTS AND CAREGIVERS

Leaving a child alone in a vehicle can lead to tragedy. These deaths, while accidental, are always preventable. Here are some helpful tips to make sure it doesn't happen to your family.

REMEMBER:

- Never leave a child alone in a parked car, even with the windows rolled down or the air conditioning on. A child's body temperature can rise 3 to 5 times faster than an adult's. A core body temperature of 107 degrees is lethal.
- Always look in both the front and back of the vehicle before locking the door and walking away.
- Heatstroke can occur in temperatures as low as 57 degrees. On an 80-degree day, temperatures inside a vehicle can reach deadly levels in just 10 minutes.
- Never let children play in an unattended vehicle. Teach them a vehicle is not a play area.
- Always lock your vehicle doors and trunk, and keep the keys out of a child's reach. If a child is missing, quickly check all vehicles, including the trunk.

Come up with ways to remind yourself that a child is in your vehicle. Here are some suggestions:

- Place a briefcase, purse or cell phone next to the child's car seat so that you'll always check the back seat before leaving the car.
- Put a teddy bear in the passenger seat as reminder to check the back seat before you exit the vehicle.
- Have your childcare provider call you if your child doesn't arrive.
- Write a note and place it on the dashboard of your car, or set a reminder on your cell phone or calendar.
- If taking your child to day care is not part of your usual routine, call your spouse or another caregiver to confirm you've dropped off your child.

REMEMBER:

Kids and hot cars are a deadly combination. Don't take the chance. Look before you lock.

where's baby?

Look before you lock.
